

Thesis Draft 1

zkap098

July 2026

Contents

1	Introduction and Background	3
1.1	The Atlantic Meridional Overturning Circulation	3
1.2	Evidence for AMOC Weakening	3
1.3	Tipping Points	3
1.4	Early Warning Signals	3
1.4.1	Signal 1	3
1.4.2	Signal 2	3
1.5	Inflection Point Study	3
1.6	Machine Learning for Climate Prediction	3
1.6.1	Classification	3
1.6.2	Convolutional Neural Networks	3
1.6.3	Long Short-Term Memory Networks	3
1.6.4	Convolutional LSTM Networks	3
1.7	Research Objectives	3
2	Datasets and Methodology	3
2.1	Study Region	3
2.2	Datasets	3
2.2.1	ORAS5 Ocean Reanalysis	3
2.2.2	ERA5 Atmospheric Reanalysis	3
2.2.3	Variables Used	3
2.3	Data Pre-processing	3
2.3.1	Spatial Subsetting	3
2.3.2	Re-gridding and Combination	3
2.3.3	Normalisation	3
2.3.4	Training, Validation and Test Sets	3
2.4	ConvLSTM Architecture	3
2.5	Model Training	3
2.6	Performance Metrics	3
2.7	Early Warning Signal Analysis	3
3	Model Performance	3

4 Conclusion	3
A Additional Figures	3

1	Introduction and Background
1.1	The Atlantic Meridional Overturning Circulation
1.2	Evidence for AMOC Weakening
1.3	Tipping Points
1.4	Early Warning Signals
1.4.1	Signal 1
1.4.2	Signal 2
1.5	Inflection Point Study
1.6	Machine Learning for Climate Prediction
1.6.1	Classification
1.6.2	Convolutional Neural Networks
1.6.3	Long Short-Term Memory Networks
1.6.4	Convolutional LSTM Networks
1.7	Research Objectives
2	Datasets and Methodology
2.1	Study Region
2.2	Datasets
2.2.1	ORAS5 Ocean Reanalysis
2.2.2	ERA5 Atmospheric Reanalysis
2.2.3	Variables Used
2.3	Data Pre-processing
2.3.1	Spatial Subsetting
2.3.2	Re-gridding and Combination
2.3.3	Normalisation
2.3.4	Training, Validation and Test Sets
2.4	ConvLSTM Architecture
2.5	Model Training
2.6	Performance Metrics
2.7	Early Warning Signal Analysis
3	Model Performance
4	Conclusion
A	Additional Figures
